Hello! Need to make figures meaningful? Or make sense. You are in the right place. Welcome.

Willing to help out in giving solutions Via data. Specilization in Data analysing, Data Visualisation, Cleaning of data, Building models for organisations, workplaces and individuals with personal needs for explanation of data challenges is what I do.

I like to analyze data to answer research questions, Building models for predictions and test hypotheses. Currently I investigate questions related to youths and behavoiur using the logistic regression and structural Equation modelling at University of Lagos, Lagos, Nigeia in the department of Mathematics and Statistics.

I graduated from the Ambrose Alli University, Ekpoma, Edo State with a BSc in statistics from the department of Mathematics and statistics in 2005.

I am an R fan, using r for whatever I desire to get. This website is built in r language.
